Performance Indicators

Performance indicators are for measuring progress against the five operational objectives of The Strategy, in line with decision 3/COP.8. The year 2008 (the first year of the Strategy) serves as the baseline year.

Developed country Parties are requested to report on the following ten performance indicators out of the eighteen consolidated performance indicators presented in ICCD/CRIC(8)/5/Add.1 and Add.2.

Reporting is guided by means of templates, one for each performance indicator. Within the templates, shaded areas contain information and explanatory texts and white areas are for reporting purposes and need to be filled in by developed country Parties with relevant quantitative data, selection of multiple choice boxes, or narrative information.

Operational Objective 1: Advocacy, awareness raising and education

CONS-O-1 for Outcome 1.1

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-1 for Outcome 1.1

Number and size of information events organised on the subject of DLDD and/or DLDD synergies with climate change and biodiversity, and audience reached by media addressing DLDD and DLDD synergies.

Understanding of the indicator

At the national level, the indicator measures the performance of Convention-related communication strategies, in particular, whether DLDD issues and synergies are being communicated and if so, whether the communication is considered to be effective. Effectiveness is assessed through the appraisal of the media campaigns carried out; the assumption is that the stronger the media campaigns on DLDD issues and synergies, the higher the probability of passing the messages on to the target audience. The focus of the indicator is on information activities specifically dedicated to DLDD and/or DLDD synergies with climate change and biodiversity. Other reporting entities will complement the information provided by developed country Parties by reporting on Convention-related communication strategies at national, subregional, regional and global level.

Data needed

Information on events/media specifically addressing DLDD and/or DLDD synergies with climate change and biodiversity. Attendance lists of events (meetings, workshops, seminars), programmes/projects' documents, estimate of target audience for major media events (campaigns, radio and television programmes, etc.). Events organised and media produced by the UNCCD NFP or organised/produced by third parties not directly reporting to the Convention (TV channels, newspaper editors, etc.) shall be considered.

Data sources (indicative only)

International and national media (newspapers) advertising the events at national and local level, the Internet, the organisers of the events, programmes/projects' final reports.

Countries being both ‘affected’ and ‘developed’ only report on this indicator as ‘affected’

Media products have been grouped into: (a) Paper media products (articles, press releases, leaflets, flyers, brochures and comics, etc.); (b) radio and television programmes; (c) other ICT (websites, CDs, DVD, etc.).

Overall Target

By 2018, 30 per cent of the global population is informed about DLDD and DLDD synergies with climate change and biodiversity

**Sources of information**

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

- The data for CONS-O-1 was collected with questionnaires which were sent out to five core CSOs (Misereor, EDD – Church Development Service, Brot für die Welt, CARE, Deutsche Welthungerhilfe).
- For STIs the DesertNet Germany network has been contacted, but only five members and the network chair himself answered the questionnaire.
- Additionally, we searched the internet and relevant online and offline libraries for publications, TV and radio broadcasts and relevant web pages with a closed list of catchwords.
- For articles in print media only the overall amount printed can be assessed and not the actual number of people which read an article on DLDD-related issues.
- For TV and radio broadcasts on DLDD-related reports no specific numbers of viewers are available. TV and radio stations only provide theoretical viewers to a given time which are not connected to a specific broadcast.
- For internet pages, only the viewers for an entire page can be assessed and not the readers of a single article.
- Further information on events, relevant publications and web pages was extracted from an internal workshop and existing internal data bases.
- Detailed information on sources of information can be found in the attached files. The first file contains the data collected during the reporting process.
- If the method suggested here was correct, 230 million Germans (out of a population of 82 million) would be informed about the UNCCD. Therefore, the second file explains why in the case of CONS-O-1 an alternative approach was used.

CONS-O-3 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-3 for Outcome 1.3

Number of civil society organisations (CSOs) and science and technology institutions (STIs) participating in the Convention processes.

Understanding of the indicator

At the national level, the indicator measures the level of participation of civil society organizations (CSOs) and science and technology institutions (STIs) in DLDD-related programmes and projects. The indicator will outline whether the active involvement of these stakeholders in country-based initiatives increases over time and whether DLDD-related programmes/projects are valid tools for the engagement of, and receiving contributions from, CSOs and STIs at the field level. Other reporting entities will complement the information provided by developed country Parties by reporting on the involvement of CSOs and STIs at national, subregional, regional and global level; in particular, the secretariat and the GM will report on the involvement of CSOs and STIs at the institutional level.

Data needed

The specification of the CSOs and STIs involved in the DLDD-related programmes/projects as reported in the PPSs.

Data sources (indicative only)

PPSs submitted to the UNCCD as part of the reporting exercise.

Check the glossary for

Overall Target

A steady growth in the reported participation of CSOs and STIs in the Convention processes along the implementation period of The Strategy.

In the PPSs you have specified the number of CSOs and the number of STIs involved in each programme/project. Add these numbers and give the totals by year in the table below.

CONS-O-4 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-4 for Outcome 1.3
Number and type of DLDD-related initiatives of civil society organisations (CSOs) and science and technology institutions (STIs) in the field of education.

Understanding of the indicator
The indicator measures the number and type of DLDD-related initiatives undertaken by CSOs and STIs in the education sector at the national level. The assumption is that the higher the number of DLDD-related education initiatives undertaken by these stakeholders, the stronger their interest in addressing DLDD problems. A distinction is made between activities carried out in the formal education sector and in the non-formal education sector. This indicator focuses on “education” because “awareness” and “advocacy” are already measured through indicators CONS-O-1 and CONS-O-2, respectively. Other reporting entities will complement the information provided by developed country Parties by reporting on the involvement of CSOs and STIs at national, subregional, regional and global level.

Data needed
Information on initiatives undertaken in the field of education that may be found in: written communications by CSOs and STIs to the NFP; contractual and/or programme/project-related documents; records of academic bodies and their curricula. Only initiatives in the field of education (formal and non-formal) directly relating to DLDD issues are to be considered.

Data sources (indicative only)
CSOs and STIs operating in the country.

Check the glossary for 'CSOs', 'STIs', 'NFP', 'Formal education', 'Non-formal education'.

Countries being both ‘affected’ and ‘developed’ only report on this indicator as ‘affected’

Overall target
A steady growth in the number of DLDD-related education initiatives undertaken by CSOs and STIs along the implementation period of The Strategy

Specify the sources used to extract the information provided above (add as many rows as necessary). If reporting online, you may also upload relevant documents.

- **Key persons from CSOs** (Misereor, EDD – Church Development Service, Brot für die Welt, CARE, Deutsche Welthungerhilfe) and from the implementing agencies of German development cooperation with a mandate for awareness raising in Germany (InWEnt, DED) were interviewed.
- For STIs the DesertNet Germany network has been contacted, but only 5 members and the network chair himself answered the questionnaire.
- **Comment:** Indicator is more valid for affected countries rather than for developed countries. For donor countries the indicator could only relate to education activities within the country itself. Answers are related to education activities in CSOs and STIs in and for Germany only.
- **Most German STIs** offering secondary and higher education in Geography, Tropical Agriculture, international environment, landscape ecology, etc. are supposed to include formal education related to DLDD.
- **CSOs** offer non-formal education such as weekend symposia evening lectures and others but on irregular and decentralised basis. There are no means to monitor the total number of events allowing to detect decrease or increase in activities.
- There are no standardized means to monitor the total number of events, allowing to monitor a decrease or increase in activities.

### National contribution to the target

At the time of reporting, is your government undertaking concrete initiatives to increase the delivery of DLDD-related initiatives in the education sector by CSOs and STIs?

- Yes

Performance indicator CONS-O-6 for Outcome 2.4

Operational Objective 2: Policy framework

Performance indicator CONS-O-6 for Outcome 2.4
Number of partnership agreements established within the framework of the Convention between developed country Parties/United Nations and IGOs and affected country Parties.

Understanding of the indicator
The indicator measures the existence of policy-enabling environments by quantifying the number of partnership agreements established between developed country Parties on one side and affected country Parties on the other, on a bilateral basis but always and only within the framework of UNCCD. Partnership agreements allow the mainstreaming of UNCCD objectives and SLM interventions into the development cooperation programmes and projects of developed country Parties; they also provide affected country Parties with a regular flow of resources according to written terms and conditions. The assumption is that the higher the number of partnerships agreements on which affected country Parties may count, the higher their chance of relying on diverse resources to tackle the objectives of the Convention. UN and IGOs will complement the information provided by developed country Parties by reporting on partnership agreements established with affected country Parties on a multilateral basis.

Data needed
Records of partnership agreements concluded in a written form.
Only partnership agreements directly relating to the UNCCD and concluded within the framework of the Convention are to be considered.
Only agreements under implementation at the time of reporting shall be considered.

Data sources (indicative only)

A distinction shall be made between those agreements which relate to integrated investment frameworks and those which do not.

Overall target
By 2014, at least two UNCCD-related partnership agreements are active in each affected country Party.

**Performance indicator CONS-O-7 for Outcome 2.5**

Operational Objective 2: Policy framework

Performance indicator CONS-O-7 for Outcome 2.5

Number of initiatives for synergistic planning/programming of the three Rio Conventions or mechanisms for joint implementation, at all levels.

Understanding of the indicator

The indicator measures the existence of synergistic processes through the number of instruments (i.e. joint planning/programming and/or operational mechanisms) in place in affected country Parties and/or at subregional/regional level which foster the introduction of or strengthen the mutually reinforcing measures among the three Rio Conventions and whose establishment has been supported (technically and/or financially) by developed country Parties either within the framework of UNCCD or of other initiatives. The assumption is that the higher the number of enabling instruments in place, the higher the possibility of achieving synergies in implementation. The information provided by developed country Parties will be complemented by the reporting of other entities on synergistic processes at the national, subregional, regional and global level.

Data needed

Planning/programming documents, information from partnership agreements and programmes/projects. Only operational mechanisms which have the achievement of joint implementation, synergies, convergence, and the introduction or strengthening of reinforcing measures among the Rio Conventions clearly stated in their objectives shall be considered under this indicator.

Data sources (indicative only)

Relevant national ministries, partnership agreements, programmes/projects reports.

Operational Objective 3: Science, technology and knowledge

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2
Number of affected country Parties, subregional and regional entities to have established and supported a national/subregional/regional monitoring system for DLDD.

Understanding of the indicator
The indicator measures the monitoring potential of affected countries, subregional and regional entities by quantifying the number of monitoring systems established and supported at their respective geographical levels. These monitoring systems may be specifically or partially (in the case of environmental monitoring systems) dedicated to UNCCD reporting. The indicator will inform on the extent to which it is realistic to expect more regular and coherent reporting by affected country Parties, subregional and regional entities during the implementation of The Strategy and beyond. Developed country Parties are requested to report on monitoring systems whose establishment they have supported (technically and/or financially) either within the framework of UNCCD or of other initiatives and within the timeframe of the reporting period. The information provided by developed country Parties will be complemented by the reporting of other entities on UNCCD-relevant monitoring systems established and supported at the subregional, regional and global level.

Data needed
Information on monitoring systems established within the national Ministries or other bodies/institutions in affected country Parties, UNCCD subregions/regions. Programmes/projects' documents, fiches and summary sheets, programmes/projects’ interim or final reports. Only those monitoring systems storing all or most of the information needed for reporting to the UNCCD shall be considered.

Data sources (indicative only)
Relevant national ministries, programmes/projects documents or reports, other non-governmental initiatives.

Check the glossary for ‘monitoring system’, ‘vulnerability’ (‘vulnerability is referred to in the definition of ‘monitoring system’)

Overall target
By 2018, at least 60 per cent of affected country Parties, subregional and regional reporting entities have established and supported national monitoring systems for DLDD

Performance indicator CONS-O-11 for Outcome 3.5

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-11 for Outcome 3.5
Type, number and users of DLDD-relevant knowledge-sharing systems at the global, regional, subregional and national levels described on the Convention website.

Understanding of the indicator
The indicator measures the presence at the national level of DLDD-related knowledge-sharing processes, through the quantification of the type and number of existing knowledge-sharing systems. Effectiveness of these systems is measured through quantification of their user-base. The indicator will inform to what extent scientific and traditional knowledge, including best practices, are available to and sufficiently shared with end-users. This information will be complemented by the reporting of other reporting entities on existing UNCCD-relevant knowledge-sharing systems at the subregional, regional and global level.

Data needed
Information from websites.
Only DLDD-relevant knowledge-sharing systems and networks shall be considered.

Operational Objective 4: Capacity building

Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2

Number of countries, subregional and regional reporting entities engaged in building capacity to combat DLDD on the basis of NCSA or other methodologies and instruments

Understanding of the indicator
The indicator measures the presence of DLDD-related capacity-building processes implemented in affected country Parties and/or at subregional/regional level through the quantification of existing major capacity-building initiatives supported by developed country Parties. The indicator will inform to what extent affected country Parties, subregional and regional entities may be expected to meet their obligations foreseen by the Convention, including forthcoming ones (i.e. new reporting requirements, establishment of environmental monitoring systems, accessing new financing mechanisms). The information provided by developed country Parties will be complemented by the reporting of other entities on existing UNCCD-related capacity-building initiatives at the national, subregional, regional and global level.

Data needed

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-14 for Outcome 5.1

Number of affected country Parties, subregional and regional entities whose investment frameworks, established within the IFS devised by the GM or within other integrated financing strategies, include the leverage of national, bilateral and multilateral resources for combating desertification and land degradation.

Understanding of the indicator
The indicator measures the presence of integrated financing processes allowing the leverage of national, bilateral and multilateral resources for combating desertification and land degradation, through the quantification of investment frameworks financially and/or technically supported by developed country Parties in affected countries and/or in subregions/regions. Investment frameworks may be those developed within the IFS devised by the GM or other integrated financing strategies promoted by diverse international institutions. The information provided by developed country Parties will be complemented by the reporting of other reporting entities on the establishment of integrated investment frameworks at national, subregional and regional level.

Data needed
Investment frameworks documents.

Only investment frameworks prepared along the guidelines devised within integrated financing strategies shall be considered. A distinction shall be made between integrated investment frameworks established within the IFS devised by the GM and those established within other integrated financing strategies.

Performance indicator CONS-O-15 for Outcome 5.2

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-15 for Outcome 5.2
Amount of financial resources made available by developed country Parties to combat DLDD.

Understanding of the indicator
The indicator measures the performance of the bilateral contribution process through quantification of the flow of financial resources from developed country Parties to affected country Parties for the implementation of the Convention, in compliance of the obligation foreseen by article 6 of the Convention, paragraph (b). The level of performance will indicate whether financial resources contributed by developed country Parties in the reporting period are substantial enough. Only developed country Parties report on this indicator.

Data needed
Total amounts committed and total amounts disbursed within DLDD-related programmes and projects supporting affected country
Parties.

Data sources (indicative only)
- SFAs submitted to UNCCD as part of the reporting exercise.
- Programmes/projects accounts.

Only programmes/projects where the reporting developed country Party has made a financial contribution shall be considered.

- Commitments and disbursements as listed in the PPS without contributions to the UNCCD budget or any contribution to multilateral organisations.
- Germany provides a considerable share of the funding of multilateral institutions involved in UNCCD implementation. However, it is not possible to quantify which share of the German contribution to these organisations directly serves UNCCD-related activities.
- Germany makes significant contributions to the EU, UNDP/UNSO, UNESCO, UNEP and FAO, the World Bank and regional development banks. With its contributions to the Global Environment Facility (GEF), which made up about 13.5% of the GEF budget, Germany is the third largest donor to the GEF.
- To estimate the approximated value of amounts disbursed a balance was struck between standardisation and steps to assure quality.

The CRIC has recommended that financial reporting be based on a standard financial reporting format to be used by affected country Parties and their development partners. It also indicated that emphasis in reports should be put on financial matters and also on an analysis of the impact of the activities undertaken (ICCD/CRIC(8)/5).

The purpose of the Standard Financial Annex (SFA) is to consolidate information on resources mobilised by affected country Parties and their development partners under the framework of relevant strategies and action programmes. It facilitates the aggregation of data on financial commitments, financial flows and resources available by all relevant funding sources for activities related to the implementation of the Convention. It also helps minimise double counting in financial statistics (ICCD/CRIC(8)/5/Add.4).

The SFA is to be used by each country Party and other reporting entities to list all financial commitments they have made during the reporting period in support of institutions, programmes, projects, as well as other relevant initiatives undertaken at national or international level for the implementation of the Convention.

More specifically, for each relevant financial commitment or allocation made in the reporting period, the SFA requires a minimum set of data grouped as follows:

Identification, i.e. data required to identify the reporting entity, the funding source and the activity financed;

Basic data, i.e. data specifying the amount and type of financial commitment made, as well as the recipient country, region, and/or organisation, and the funding period, if applicable;

Classification, i.e. categorisation of the funded activity according to the Rio Markers for desertification, and the UNCCD Relevant Activity Codes (RACs).

The compilation of the SFA is guided by means of a template, which responds to the recommendations of CRIC 7, and builds on the GM methodological guide for financial reporting presented to CRIC 6 as part of the report of the intergovernmental Ad Hoc Working Group to improve the procedures for communication of information.

Within the template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by the reporting entities with relevant data or narrative information.

Decision 13/COP.9, paragraph 8, invites country Parties and other reporting entities to refer to common terminology and definitions. Therefore, these guidelines should be read in conjunction with the comprehensive glossary presented in a separate document.
