Performance Indicators

Performance indicators are for measuring progress against the five operational objectives of The Strategy, in line with decision 3/COP.8. The year 2008 (the first year of the Strategy) serves as the baseline year.

Developed country Parties are requested to report on the following ten performance indicators out of the eighteen consolidated performance indicators presented in ICCD/CRIC(8)/5/Add.1 and Add.2.

Reporting is guided by means of templates, one for each performance indicator. Within the templates, shaded areas contain information and explanatory texts and white areas are for reporting purposes and need to be filled in by developed country Parties with relevant quantitative data, selection of multiple choice boxes, or narrative information.

Operational Objective 1: Advocacy, awareness raising and education

CONS-O-1 for Outcome 1.1

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-1 for Outcome 1.1

Number and size of information events organised on the subject of DLDD and/or DLDD synergies with climate change and biodiversity, and audience reached by media addressing DLDD and DLDD synergies.

Understanding of the indicator

At the national level, the indicator measures the performance of Convention-related communication strategies, in particular, whether DLDD issues and synergies are being communicated and if so, whether the communication is considered to be effective. Effectiveness is assessed through the appraisal of the media campaigns carried out; the assumption is that the stronger the media campaigns on DLDD issues and synergies, the higher the probability of passing the messages on to the target audience. The focus of the indicator is on information activities specifically dedicated to DLDD and/or DLDD synergies with climate change and biodiversity. Other reporting entities will complement the information provided by developed country Parties by reporting on Convention-related communication strategies at national, subregional, regional and global level.

Data needed

Information on events/media specifically addressing DLDD and/or DLDD synergies with climate change and biodiversity.

Attendance lists of events (meetings, workshops, seminars), programmes/projects' documents, estimate of target audience for major media events (campaigns, radio and television programmes, etc.).

Events organised and media produced by the UNCCD NFP or organised/produced by third parties not directly reporting to the Convention (TV channels, newspaper editors, etc.) shall be considered.

Data sources (indicative only)

International and national media (newspapers) advertising the events at national and local level, the Internet, the organisers of the events, programmes/projects' final reports.

Countries being both ‘affected’ and ‘developed’ only report on this indicator as ‘affected’

Media products have been grouped into: (a) Paper media products (articles, press releases, leaflets, flyers, brochures and comics, etc.); (b) radio and television programmes; (c) other ICT (websites, CDs, DVD, etc.).

Overall Target

By 2018, 30 per cent of the global population is informed about DLDD and DLDD synergies with climate change and biodiversity

CONS-O-3 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-3 for Outcome 1.3
Number of civil society organisations (CSOs) and science and technology institutions (STIs) participating in the Convention processes.

Understanding of the indicator
At the national level, the indicator measures the level of participation of civil society organizations (CSOs) and science and technology institutions (STIs) in DLDD-related programmes and projects. The indicator will outline whether the active involvement of these stakeholders in country-based initiatives increases over time and whether DLDD-related programmes/projects are valid tools for the engagement of, and receiving contributions from, CSOs and STIs at the field level. Other reporting entities will complement the information provided by developed country Parties by reporting on the involvement of CSOs and STIs at national, subregional, regional and global level; in particular, the secretariat and the GM will report on the involvement of CSOs and STIs at the institutional level.

Data needed
The specification of the CSOs and STIs involved in the DLDD-related programmes/projects as reported in the PPSs.

Data sources (indicative only)
PPSs submitted to the UNCCD as part of the reporting exercise.

Check the glossary for

Countries being both ‘affected’ and ‘developed’ only report on this indicator as ‘affected’

Overall Target
A steady growth in the reported participation of CSOs and STIs in the Convention processes along the implementation period of The Strategy.

In the PPSs you have specified the number of CSOs and the number of STIs involved in each programme/project. Add these numbers and give the totals by year in the table below.

CONS-O-4 for Outcome 1.3

Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-4 for Outcome 1.3

Number and type of DLDD-related initiatives of civil society organisations (CSOs) and science and technology institutions (STIs) in the field of education.

Understanding of the indicator

The indicator measures the number and type of DLDD-related initiatives undertaken by CSOs and STIs in the education sector at the national level. The assumption is that the higher the number of DLDD-related education initiatives undertaken by these stakeholders, the stronger their interest in addressing DLDD problems. A distinction is made between activities carried out in the formal education sector and in the non-formal education sector. This indicator focuses on “education” because “awareness” and “advocacy” are already measured through indicators CONS-O-1 and CONS-O-2, respectively. Other reporting entities will complement the information provided by developed country Parties by reporting on the involvement of CSOs and STIs at national, subregional, regional and global level.

Data needed

Information on initiatives undertaken in the field of education that may be found in: written communications by CSOs and STIs to the NFP; contractual and/or programme/project-related documents; records of academic bodies and their curricula.

Only initiatives in the field of education (formal and non-formal) directly relating to DLDD issues are to be considered.

Data sources (indicative only)

CSOs and STIs operating in the country.

Countries being both ‘affected’ and ‘developed’ only report on this indicator as ‘affected’

Overall target

A steady growth in the number of DLDD-related education initiatives undertaken by CSOs and STIs along the implementation period of The Strategy

Operational Objective 2: Policy framework

Performance indicator CONS-O-6 for Outcome 2.4

Number of partnership agreements established within the framework of the Convention between developed country Parties/United Nations and IGOs and affected country Parties.

Understanding of the indicator

The indicator measures the existence of policy-enabling environments by quantifying the number of partnership agreements established between developed country Parties on one side and affected country Parties on the other, on a bilateral basis but always and only within the framework of UNCCD. Partnership agreements allow the mainstreaming of UNCCD objectives and SLM interventions into the development cooperation programmes and projects of developed country Parties; they also provide affected country Parties with a regular flow of resources according to written terms and conditions. The assumption is that the higher the number of partnerships agreements on which affected country Parties may count, the higher their chance of relying on diverse resources to tackle the objectives of the Convention. UN and IGOs will complement the information provided by developed country Parties by reporting on partnership agreements established with affected country Parties on a multilateral basis.

Data needed

Records of partnership agreements concluded in a written form.

Only partnership agreements directly relating to the UNCCD and concluded within the framework of the Convention are to be considered.

Only agreements under implementation at the time of reporting shall be considered.

Data sources (indicative only)

Relevant national ministries

Check the glossary for ‘partnership agreement’, ‘integrated investment framework’, ‘IFS’

A distinction shall be made between those agreements which relate to integrated investment frameworks and those which do not.

Overall target

By 2014, at least two UNCCD-related partnership agreements are active in each affected country Party.

Performance indicator CONS-O-7 for Outcome 2.5

Operational Objective 2: Policy framework

Performance indicator CONS-O-7 for Outcome 2.5
Number of initiatives for synergistic planning/programming of the three Rio Conventions or mechanisms for joint implementation, at all levels.

Understanding of the indicator
The indicator measures the existence of synergistic processes through the number of instruments (i.e. joint planning/programming and/or operational mechanisms) in place in affected country Parties and/or at subregional/regional level which foster the introduction of or strengthen the mutually reinforcing measures among the three Rio Conventions and whose establishment has been supported (technically and/or financially) by developed country Parties either within the framework of UNCCD or of other initiatives. The assumption is that the higher the number of enabling instruments in place, the higher the possibility of achieving synergies in implementation. The information provided by developed country Parties will be complemented by the reporting of other entities on synergistic processes at the national, subregional, regional and global level.

Data needed
Planning/programming documents, information from partnership agreements and programmes/projects.
Only operational mechanisms which have the achievement of joint implementation, synergies, convergence, and the introduction or strengthening of reinforcing measures among the Rio Conventions clearly stated in their objectives shall be considered under this indicator.

Data sources (indicative only)
Relevant national ministries, partnership agreements, programmes/projects reports.

Check the glossary for
“Joint planning/programming initiatives”, “Operational mechanisms for joint implementation or mutual reinforcement”, “Partnership agreements”

For an indicative list of activities by Parties to promote synergies among the Rio Conventions, refer to [UNEP/CBD COP/DC/IX/16, Annex II](http://www.oecd.org/dataoecd/29/21/2754804.pdf)

Overall target
By 2014, each affected country Party has either one joint national plan in place or functional mechanism(s) to ensure synergies among the three Rio Conventions.[http://www.oecd.org/dataoecd/29/21/2754804.pdf](http://www.oecd.org/dataoecd/29/21/2754804.pdf)

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-8 for Outcomes 3.1 and 3.2

Number of affected country Parties, subregional and regional entities to have established and supported a national/subregional/regional monitoring system for DLDD.

Understanding of the indicator
The indicator measures the monitoring potential of affected countries, subregional and regional entities by quantifying the number of monitoring systems established and supported at their respective geographical levels. These monitoring systems may be specifically or partially (in the case of environmental monitoring systems) dedicated to UNCCD reporting. The indicator will inform on the extent to which it is realistic to expect more regular and coherent reporting by affected country Parties, subregional and regional entities during the implementation of The Strategy and beyond. Developed country Parties are requested to report on monitoring systems whose establishment they have supported (technically and/or financially) either within the framework of UNCCD or of other initiatives and within the timeframe of the reporting period. The information provided by developed country Parties will be complemented by the reporting of other entities on UNCCD-relevant monitoring systems established and supported at the subregional, regional and global level.

Data needed
Information on monitoring systems established within the national Ministries or other bodies/institutions in affected country Parties, UNCCD subregions/regions. Programmes/projects' documents, fiches and summary sheets, programmes/projects' interim or final reports. Only those monitoring systems storing all or most of the information needed for reporting to the UNCCD shall be considered.

Data sources (indicative only)
Relevant national ministries, programmes/projects documents or reports, other non-governmental initiatives.

Check the glossary for 'monitoring system', 'vulnerability' ('vulnerability is referred to in the definition of 'monitoring system')

Overall target
By 2018, at least 60 per cent of affected country Parties, subregional and regional reporting entities have established and supported national monitoring systems for DLDD

**Performance indicator CONS-O-11 for Outcome 3.5**

Type, number and users of DLDD-relevant knowledge-sharing systems at the global, regional, subregional and national levels described on the Convention website.

**Understanding of the indicator**

The indicator measures the presence at the national level of DLDD-related knowledge-sharing processes, through the quantification of the type and number of existing knowledge-sharing systems. Effectiveness of these systems is measured through quantification of their user-base. The indicator will inform to what extent scientific and traditional knowledge, including best practices, are available to and sufficiently shared with end-users. This information will be complemented by the reporting of other reporting entities on existing UNCCD-relevant knowledge-sharing systems at the subregional, regional and global level.

Operational Objective 4: Capacity building

Performance indicator CONS-O-13 for Outcomes 4.1 and 4.2

Number of countries, subregional and regional reporting entities engaged in building capacity to combat DLDD on the basis of NCSA or other methodologies and instruments

Understanding of the indicator
The indicator measures the presence of DLDD-related capacity-building processes implemented in affected country Parties and/or at subregional/regional level through the quantification of existing major capacity-building initiatives supported by developed country Parties. The indicator will inform to what extent affected country Parties, subregional and regional entities may be expected to meet their obligations foreseen by the Convention, including forthcoming ones (i.e. new reporting requirements, establishment of environmental monitoring systems, accessing new financing mechanisms). The information provided by developed country Parties will be complemented by the reporting of other entities on existing UNCCD-related capacity-building initiatives at the national, subregional, regional and global level.

Data needed
Information on DLDD-related capacity building initiatives.
Only major capacity-building plans/programmes/projects are to be considered.

Data sources (indicative only)
PPSs submitted to UNCCD as part of the reporting exercise
Programmes/projects’ documents, fiches and summary sheets, interim or final reports of those programmes and projects identified through the PPSs as having DLDD-related capacity-building as a major objective.

Check the glossary for ‘NCSA’, ‘PPS’

Overall target

Performance indicator CONS-O-14 for Outcome 5.1

Operational Objective 5: Financing and technology transfer

Number of affected country Parties, subregional and regional entities whose investment frameworks, established within the IFS devised by the GM or within other integrated financing strategies, include the leverage of national, bilateral and multilateral resources for combating desertification and land degradation.

Understanding of the indicator
The indicator measures the presence of integrated financing processes allowing the leverage of national, bilateral and multilateral resources for combating desertification and land degradation, through the quantification of investment frameworks financially and/or technically supported by developed country Parties in affected countries and/or in subregions/regions. Investment frameworks may be those developed within the IFS devised by the GM or other integrated financing strategies promoted by diverse international institutions. The information provided by developed country Parties will be complemented by the reporting of other reporting entities on the establishment of integrated investment frameworks at national, subregional and regional level.

Data needed
Investment frameworks documents.
Only investment frameworks prepared along the guidelines devised within integrated financing strategies shall be considered. A distinction shall be made between integrated investment frameworks established within the IFS devised by the GM and those established within other integrated financing strategies.

Data sources (indicative only)
Relevant national ministries, programmes/projects documents

Check the glossary for ‘IFS', 'NAP' 'leveraging', ‘integrated investment framework’

Overall target
By 2014, at least 50 per cent of affected country Parties, subregional and regional entities to have developed integrated investment frameworks.

Performance indicator CONS-O-15 for Outcome 5.2

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-15 for Outcome 5.2

Amount of financial resources made available by developed country Parties to combat DLDD.

Understanding of the indicator

The indicator measures the performance of the bilateral contribution process through quantification of the flow of financial resources from developed country Parties to affected country Parties for the implementation of the Convention, in compliance of the obligation foreseen by article 6 of the Convention, paragraph (b). The level of performance will indicate whether financial resources contributed by developed country Parties in the reporting period are substantial enough. Only developed country Parties report on this indicator.

Data needed

Total amounts committed and total amounts disbursed within DLDD-related programmes and projects supporting affected country Parties.

Data sources (indicative only)

SFAs submitted to UNCCD as part of the reporting exercise.

Programmes/projects accounts.

Only programmes/projects where the reporting developed country Party has made a financial contribution shall be considered

D. Standard Financial Annex

The CRIC has recommended that financial reporting be based on a standard financial reporting format to be used by affected country Parties and their development partners. It also indicated that emphasis in reports should be put on financial matters and also on an analysis of the impact of the activities undertaken (ICCD/CRIC(8)/5).

The purpose of the Standard Financial Annex (SFA) is to consolidate information on resources mobilised by affected country Parties and their development partners under the framework of relevant strategies and action programmes. It facilitates the aggregation of data on financial commitments, financial flows and resources available by all relevant funding sources for activities related to the implementation of the Convention. It also helps minimise double counting in financial statistics (ICCD/CRIC(8)/5/Add.4).

The SFA is to be used by each country Party and other reporting entities to list all financial commitments they have made during the reporting period in support of institutions, programmes, projects, as well as other relevant initiatives undertaken at national or international level for the implementation of the Convention.

More specifically, for each relevant financial commitment or allocation made in the reporting period, the SFA requires a minimum set of data grouped as follows:

Identification, i.e. data required to identify the reporting entity, the funding source and the activity financed;

Basic data, i.e. data specifying the amount and type of financial commitment made, as well as the recipient country, region, and/or organisation, and the funding period, if applicable;

Classification, i.e. categorisation of the funded activity according to the Rio Markers for desertification, and the UNCCD Relevant Activity Codes (RACs).

The compilation of the SFA is guided by means of a template, which responds to the recommendations of CRIC 7, and builds on the GM methodological guide for financial reporting presented to CRIC 6 as part of the report of the intergovernmental Ad Hoc Working Group to improve the procedures for communication of information.

Within the template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by the reporting entities with relevant data or narrative information.

Decision 13/COP.9, paragraph 8, invites country Parties and other reporting entities to refer to common terminology and definitions. Therefore, these guidelines should be read in conjunction with the comprehensive glossary presented in a separate document.

Programme and Project Sheets

E. Programme and Project Sheet

Programme and Project Sheets (PPS) are used to provide more detailed information on programmes or projects undertaken or completed in the reporting period. This includes programmes and projects in the pipeline, as well as final proposals submitted for funding to internal or external funding sources. All country Parties and other reporting entities involved in the financing, coordination or implementation of relevant programmes and projects are requested to prepare a PPS for each of them, and to attach them to their official report to the UNCCD.

The compilation of the PPS is guided by means of a template. These templates are intended to collect a minimum set of qualitative and quantitative data to facilitate the analysis of funding and investment flows, and the production of better financial statistics related to UNCCD implementation (ICCD/CRIC(8)/5/Add.4), with a view to enabling the CRIC to undertake an objective review of progress in the implementation of the Convention and The Strategy. The PPS also facilitate the computation of certain performance and impact indicators.

A distinctive feature of the PPS is that it allows country Parties and other reporting entities to specify which strategic and operational objectives of The Strategy are targeted by each programme or project. In addition, it allows for individual programme or project components to be categorised using the Rio Markers for desertification and Relevant Activity Codes (RACs).

Furthermore, the PPS can be used to indicate whether the objectives of other Rio Conventions (i.e. the UN Convention on Biological Diversity, CBD – and the UN Framework Convention on Climate Change, UNFCCC) are also addressed by the programme or project. This is done through the use of the biodiversity and climate change Rio Markers, respectively.

The PPS offers an opportunity to increase the visibility of relevant programmes and projects, thereby creating the conditions for a better sharing of experiences and lessons, as well as the transfer of knowledge in general. It also favours collaboration and networking by facilitating the identification of potential synergies.

Lastly, the PPS also allows country Parties and other reporting entities to provide a narrative description of the expected or achieved results. This information will facilitate the qualitative assessment of progress in the implementation of The Strategy, including on returns on investment. The CRIC will use the analysis of financial information originating from the PPS to assess results, performance and impacts.

To minimise the reporting burden and avoid discrepancies in the information annexed to the reports of different entities, it is recommended that project partners identify the most suitable ways to coordinate among themselves the preparation of PPS to ensure that consistent data are reported for the same projects. It would also be advisable to compile just one PPS for large “umbrella” programmes, instead of separate PPS for each small project stemming from them.

In the PPS template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by country Parties and other reporting entities with relevant data or narrative information.

Additional Information

F. Additional information

The section on additional information is meant to provide an instrument of flexibility in the reporting exercise as well as to enrich the knowledge base of the CRIC on concrete issues faced by country Parties and consequently to make more targeted and specific recommendations to the COP. It allows country Parties to comment or report upon issues that are not covered elsewhere but that are nevertheless of importance within the framework of the implementation of The Strategy and the Convention.

The additional information section allows feedback to be received on the reporting process. It is also meant to accommodate ad hoc COP requests for reporting on specific topics or new reporting requirements deriving from COP deliberations that may supersede existing ones and imply changes in implementation.

The proposed template for reporting is adjusted to the mandate of developed country Parties within the framework of the Convention, as requested by decision 13/COP.9, paragraph 17.

Accommodation of specific requests within COP decisions

**Report on specific COP requests – iterative process on indicators**

Decision 13/COP.9, paragraphs 2, 3 and 24, envisages an iterative process to refine the set of performance indicators provisionally adopted by the same decision. As a tool to implement this iterative process, affected country Parties can provide here their suggestions and recommendations for improvement.

Tick the cells only when you have experienced difficulties in reporting on one, or more, indicator(s). Indicate against which of the e-SMART criteria the indicator(s) needs to be improved.

Commentaires sur les indicateurs de performance

Narrative description
Nous avons coché la case « mesurable » pour les indicateurs CONS-01, CONS-06, CONS-07, CONS-08, CONS-13, CONS-14, CONS-15, parce que nous pensons qu’il n’y a pas d’interprétations communes sur la manière de mesurer ces indicateurs ; nous avons également coché la case « spécifique » pour les indicateurs CON-01, CONS-06, CONS-13 et CONS-15 car il nous semble que les descriptions proposées pour ces indicateurs posent question :

- CONS-01 : doit-on prendre uniquement en compte les évènements d’informations et produits médias organisés/diffusés en France ? Comment évaluer la part de la population nationale informée sur les enjeux DDTS ? Comment distinguer les différentes catégories de publics touchés par les produits médias ? Comment prendre en compte l’audience des médias qui ont proposé plusieurs articles/programmes sur les enjeux DDTS (doit-on multiplier leur audience moyenne par le nombre de produits identifiés, sachant que, dans ce cas, on risque de compter plusieurs fois les mêmes personnes) ?
Par ailleurs, il faut prendre en compte que les points focaux ne peuvent pas renseigner de manière exhaustive l’ensemble des évènements d’information et produits médias sur les enjeux DDTS au niveau national (et que les informations transmises dans le cadre de cet indicateur ne peuvent donc qu’être partielles).

- CONS-06 : doit-on prendre uniquement en compte les accords de partenariat établis dans le cadre de la CNULD (très restrictif), et négliger ainsi les accords de partenariat établis dans un autre cadre mais répondant aux objectifs de la Convention ? Doit-on prendre en compte le nombre d’accords de partenariat établis en 2008/2009 ou en cours de mise en œuvre en 2008/2009 ?

- CONS-07, CONS-08, CONS-13, CONS-14 : doit-on indiquer : 1) si nous avons engagé des financements dans ces domaines en 2008/2009 ; ou 2) si des projets d’appui que nous finançons dans ces domaines sont en cours de mise en œuvre en 2008/2009 (ce n’est pas la même chose, car il y a souvent un décalage entre les engagements et la mise en œuvre effective des projets) ; ou encore 3) si les instruments mentionnés dans ces différents indicateurs (mécanismes de mise en œuvre conjointe des 3 conventions, systèmes de suivi environnemental, cadres d’investissement intégrés, etc) ont été officiellement établis en 2008/2009 (là encore, ce n’est pas la même chose, car l’établissement officiel de ces instruments constitue souvent la finalité des projets et n’intervient donc qu’à la fin de ces derniers) ?

- CONS-13 : comment doit-on interpréter l’instruction de ne prendre en compte que les initiatives « importantes » de renforcement des capacités ?

- CONS-15 : doit-on prendre en compte les contributions multilatérales (notamment celles ciblées sur les enjeux DDTS : appui au Mécanisme Mondial de la CNULD, contribution au Secrétariat de la CNULD, appui à l’initiative TerrAfrica, appui à des organisations régionales type OSS, etc.) ?
Pour le montant total décaissé (information difficile à collecter de notre point de vue), devons-nous renseigner les montants effectivement décaissés pour les projets engagés en 2008/2009 ou l’ensemble des montants décaissés en 2008/2009 (y compris pour des projets qui auraient été engagés avant 2008) ?
Il nous semble indispensable que, pour les prochains exercices de reporting, les recommandations suivantes soient prises en compte :

- présentation de l’Annexe Financière et des Fiches de suivi des projets/programmes sous la forme de tableaux Excel récapitulatifs (dans le PRAIS).

- simplification des formats proposés pour l’Annexe Financière et les Fiches de Suivi des projets/programmes (suppression de certains champs : dates de début et de fin de financement, superficie de la zone concernée, nombre total de personnes bénéficiaires, marqueurs de Rio UNFCC et UNCBD, objectifs stratégiques et opérationnels de la CNULD, marqueurs de Rio et CAP pour les différentes composantes des projets, etc. ; simplification de certains champs : limitation du champ « CAP » au premier niveau de catégorisation, etc.).

- nécessité de prendre en compte la difficulté de mener a posteriori un travail de « notation » des projets et programmes de coopération selon les « CAP » et les « marqueurs de Rio » (travail fastidieux et délicat du fait d’une connaissance partielle des projets/programmes).

- nécessité de définir les secteurs d’interventions et/ou champs thématiques à prendre en compte pour le recensement des projets de coopération pertinents qui ne sont pas nécessairement identifiés systématiquement sous l’entrée « lutte contre la désertification » (par exemple : gestion des ressources naturelles, amélioration des systèmes de production agricole, aménagement des bassins versants, etc.), pour assurer une harmonisation des exercices de recensement et de chiffrage assurés par les différents Pays Parties.

- nécessité de trouver un équilibre entre la volonté de standardiser le format des rapports des parties et la possibilité des parties de faire part d’analyses qualitatives complémentaires aux informations quantitatives transmises, notamment dans le cadre des indicateurs de performance.
G. Best practices

According to decision 13/COP. 9, Annex V, UNCCD best practices shall be collected according to seven themes: 1. SLM technologies, including adaptation; 2. Capacity building and awareness raising; 3. DLDD and SLM monitoring and assessment/research; 4. Knowledge management and decision support; 5. Policy, legislative, institutional framework; 6. Funding/resource mobilisation; 7. Participation, collaboration and networking.

While themes 2 to 7 represent different elements of the enabling environment needed for the implementation and dissemination/up-scaling of sustainable land management (SLM) technologies (indirect impact), theme 1 comprises all actions on the ground that have a direct impact on desertification, land degradation and drought mitigation.

In particular, as specified in document ICCD/CRIC(8)/5/Add.5, paragraph 12, theme 1 ‘SLM technologies, including adaptation’ refers to SLM technologies that directly contribute to the prevention, mitigation and rehabilitation of desertification and land degradation on cropland, grazing land and woodland, with the aim of improving the livelihoods of affected populations and conserving ecosystem services. Successful implementation of SLM technologies is the base for achieving strategic objectives 1, 2 and 3 of The Strategy. Theme 1 also integrates five of the strategic areas defined by decision 8/COP.4, namely: (a) sustainable land use management, including water, soil and vegetation in affected areas; (b) sustainable use and management of rangelands; (c) development of sustainable agricultural and ranching production systems; (d) development of new and renewable energy sources; and (e) launching of reforestation/afforestation programmes/intensification of soil conservation programmes.

ICCD/CRIC(8)/5/Add.5 provides definitions for ‘practice’, ‘good practice’ and ‘best practice’. These definitions are included in the common glossary that shall be referred to by Parties and other reporting entities while reporting to UNCCD, according to decision 13/COP.9, paragraph 8.

The template for reporting is based on the general structure for the documentation of best practices contained in ICCD/CRIC(8)/5/Add.5, paragraphs 40 to 43; it is tailored to the documentation of best practices related to theme 1 ‘SLM technologies, including adaptation’.

When reporting on best practices implemented in affected country Parties, developed country Parties are expected to have contacted and coordinated with the corresponding UNCCD NFP, to ensure coherence and lack of duplication in reporting on the practice.

Best Practice #1

Question marked as 'No answer'.

Property rights
Clarify if the technology described in the template, or a part of it, is covered by property rights:

No answer provided

If yes, please provide relevant information on the holder of the rights.
(max 100 words)

Section 1. Context of the best practice: frame conditions (natural and human environment)

Question marked as 'No answer'.

Title of the best practice

No answer provided

Location (if available, also include a map)

No answer provided
If the location has well defined boundaries, specify its extension in hectares
Hectares (ha)
No answer provided

Estimated population living in the location
Number of people
No answer provided

Prevailing land use within the specified location
No answer provided

Other (specify) (max 30 words)
No answer provided

Brief description of the natural environment within the specified location.
Climate:
(max 50 words)
No answer provided

Soil:
(max 50 words)
No answer provided

Topography:
(max 50 words)
No answer provided

Prevailing socio-economic conditions of those living in the location and/or nearby
Income level:
(max 50 words)
No answer provided

Main income sources:
(max 50 words)
No answer provided

Land tenure and land use rights:
(max 50 words)
No answer provided

Question marked as ‘No answer’.

Short description of the best practice
max 250 words
No answer provided

On the basis of which criteria and/or indicator(s) (not related to The Strategy) the proposed practice and corresponding technology has been considered as ‘best’?
max 100 words
No answer provided

Section 2. Problems addressed (direct and indirect causes) and objectives of the best practice
With respect to DLDD, the best practice directly contributes to:
No answer provided

Main problems addressed by the best practice
(max 50 words)
No answer provided

Outline specific land degradation problems addressed by the best practice
max 100 words
No answer provided

Specify the objectives of the best practice
(max 50 words)
No answer provided

Section 3. Activities

Brief description of main activities, by objective
Objective 1.
(max 50 words)
No answer provided

Objective 2.
(max 50 words)
No answer provided

Objective 3.
(max 50 words)
No answer provided

Objective 4.
(max 50 words)
No answer provided

Short description of the technology
max 250 words
No answer provided

Technical specifications of the technology – if any
max 250 words
No answer provided

Section 4. Institutions/actors involved (collaboration, participation, role of stakeholders)

Name and address of the institution developing the technology
No answer provided

Was the technology developed in partnership?
No answer provided

If yes, list the partners:
Specify the framework within which the technology was promoted
No answer provided

Other (specify) (max 30 words)
No answer provided

Was the participation of local stakeholders, including CSOs, fostered in the development of the technology?
No answer provided

If yes, list local stakeholders involved:
No answer provided

For the stakeholders listed above, specify their role in the design, introduction, use and maintenance of the technology, if any.
max 250 words
No answer provided

Was the population living in the location and/or nearby involved in the development of the technology?
No answer provided

If yes, by means of what?
No answer provided

Other (specify) (max 30 words)
No answer provided

Section 5. Contribution to impact

Specify to which strategic objectives of The Strategy the technology contributes
(more than one box can be ticked)
No answer provided

Describe on-site impacts (the major two impacts by category)
Production or productivity:
1. (max 50 words)
No answer provided

2. (max 50 words)
No answer provided

Socio-economic level (including cultural level):
1. (max 50 words)
No answer provided

2. (max 50 words)
No answer provided

Environmental level:
1. (max 50 words)
No answer provided

2. (max 50 words)
No answer provided
Describe the major two off-site (i.e. not occurring in the location but in the surrounding areas) impacts
1. (max 50 words)
   No answer provided
2. (max 50 words)
   No answer provided

Impact on biodiversity and climate change
In your opinion does the best practice/technology you have proposed positively impact on biodiversity conservation?
   No answer provided

Explain the reasons:
max 250 words
   No answer provided

In your opinion does the best practice/technology you have proposed positively impact on climate change mitigation?
   No answer provided

Explain the reasons:
max 250 words
   No answer provided

In your opinion does the best practice/technology you have proposed positively impact on climate change adaptation?
   No answer provided

Explain the reasons:
max 250 words
   No answer provided

Has a cost-benefit analysis been carried out?
   No answer provided

If yes, summarize its main conclusions:
max 250 words
   No answer provided

Section 6. Connection to other UNCCD themes

Specify if the technology relates to one or more of the other UNCCD themes
   No answer provided

Section 7. Adoption and replicability

Was the technology disseminated/introduced to other locations?
If yes, where? (add as many rows as necessary)
Location:

No answer provided

Were incentives to facilitate the take up of the technology provided?

No answer provided

If yes, specify which type of incentives

No answer provided

Can you identify the three main conditions that led to the success of the presented best practice/technology?
Examples of conditions leading to success may include: highly motivated local governments, farmers organised into well structured cooperatives, extremely favorable weather conditions, etc. For each ‘condition of success’ you are able to identify, specify whether in your opinion such condition is: (a) linked to the local context and thus cannot be replicated elsewhere; (b) replicable elsewhere with some level of adaptation; (c) replicable elsewhere with major adaptation.
1. (max 50 words)

No answer provided

2. (max 50 words)

No answer provided

3. (max 50 words)

No answer provided

In your opinion, the best practice/technology you have proposed can be replicated, although with some level of adaptation, elsewhere?

No answer provided

If yes, at which level?

No answer provided

Section 8. Lessons learned

Related to human resources
(max 50 words)

No answer provided

Related to financial aspects
(max 50 words)
