Operational Objective 1: Advocacy, awareness raising and education

Performance indicator CONS-O-3 for Outcome 1.3
Performance indicator CONS-O-3 for Outcome 1.3
Number of CSOs and science and technology institutions participating in the Convention processes.

Understanding of the indicator
The indicator measures the level of participation of civil society organizations (CSOs) and science and technology institutions (STIs) at the institutional level of the UNCCD (COP, CRIC sub-regional meetings) and, in particular, within the framework of the Integrated Financing Strategy (IFS) devised by the GM. The indicator will outline whether the active involvement of these stakeholders in IFS-related initiatives increases over time and whether the IFS is a valid mechanism for the engagement of, and receiving contributions from, CSOs and STIs. Other reporting entities will complement the information provided by the GM by reporting on the involvement of CSOs and STIs at the field level, in DLDD-related programmes and projects.

Data needed
- The specification of the organizations participating to IFS-related initiatives.
- The specification of the organizations participating to the meetings of the COP and of the CRIC and to regional/subregional meetings
- Only formal engagement is to be considered. Within the IFS, formal engagement is determined/defined by the GM.

Overall target
A steady growth in the participation of CSOs and science and technology institutions in the Convention processes is recorded along the implementation period of The Strategy.

## Contribution to the target

**At the time of reporting, is the GM undertaking concrete initiatives to increase and/or facilitate the participation of CSOs and STIs in the IFS process?**

Yes

**If yes, provide a short description of actions taken to increase and/or facilitate the participation by CSOs and STIs in the IFS process.**

We have maintained and encouraged participation in IFS processes.

## Qualitative assessment

Specify the reasons for the increasing and/or decreasing trend of the participation of CSOs and STIs to the IFS process.

Harmonization with RBM reporting

**Coherent with performance indicators?**
Is reporting on CONS-O-3 coherent with and/or synergistic to the expected accomplishments and corresponding performance indicators under outcome area 1.3 of the workplan?

*Yes*  

*If yes, specify how the two are complementing each other.*  

The GM collects information on CSOs involved in IFS processes at country level

*If no, explain any evidence of incongruence and, if possible, provide reasons:*  

*No answer required.*

**Coherent with operational objective 1?**
Is reporting on CONS-O-3 coherent with and/or synergistic to the relevant expected accomplishments under operational objective 1 of the joint work programme?

*No*  

*If yes, specify how the two are complementing each other.*  

*No answer required.*

*If no, explain any evidence of incongruence and, if possible, provide reasons:*  

CONS-O-3 and JWP 1.3 are dealing with different matters. No reference to tools to support CSO engagement in UNCCD processes is foreseen under this indicator

Operational Objective 2: Policy framework

**Performance indicator CONS-O-7 for Outcome 2.5**  
Number of initiatives for synergistic planning/programming of the three Rio Conventions or mechanisms for joint implementation, at all levels.

Understanding of the indicator
The indicator measures the existence of synergistic processes through the number of instruments (i.e. joint planning/programming and/or operational mechanisms) in place at the national, regional and global levels which foster the introduction of, or strengthen the mutually reinforcing measures among, the three Rio Conventions and whose establishment has been supported (technically and/or financially) by the GM. The assumption is that the higher the number of enabling instruments in place, the higher the possibility of achieving synergies in implementation.
information provided by the GM will be complemented by the reporting of other entities on synergistic processes at the national, regional and global levels.

Data needed
- Planning/programming documents, information from partnership agreements and programmes/projects.
- Information on operational mechanisms explicitly aimed at achieving joint implementation, synergies and convergence, as well as introducing or strengthening reinforcing measures among the Rio Conventions.

Data sources (indicative only)
- Relevant units within the GM.
- Partnership agreements, global/(sub)regional programmes/projects reports.

Check the glossary for
“Joint planning/programming initiatives”, “Operational mechanisms for joint implementation or mutual reinforcement”, “Partnership agreements”

Check the reporting manual for
‘Which synergistic instruments should be included?’, ‘Indicative list of activities by Parties to promote synergies among the Rio Conventions’

Overall target
By 2014, each affected country Party has either one joint national plan in place or functional mechanism(s) to ensure synergies among the three Rio Conventions

Number of synergistic instruments implemented at national, regional and global levels with the technical and/or financial support of the GM in the reporting period

**Harmonization with RBM reporting**

Is reporting on CONS-O-7 coherent with and/or synergistic to the expected accomplishments and corresponding performance indicators under outcome area 2.5 of the workplan?

**Coherent with performance indicators?**

Yes

If yes, specify how the two are complementing each other.

They are almost identical, the information requested under indicator CONS-O-7 is more detailed.

If no, explain any evidence of incongruence and, if possible, provide reasons:

No answer required.

**Coherent with operational objective 2?**

Is reporting on CONS-O-7 coherent with and/or synergistic to the relevant expected accomplishments under operational objective 2 of the joint work programme?

No

If yes, specify how the two are complementing each other.

No answer required.

If no, explain any evidence of incongruence and, if possible, provide reasons:

Operational objectives 2 of the JWP refers to synergies in terms of elaboration of information material and
dissemination of knowledge which CONS-O-7 does not deal with.

Operational Objective 3: Science, technology and knowledge

Performance indicator CONS-O-11 for Outcome 3.5
Type, number and users of DLDD-relevant knowledge-sharing systems at the global, regional, subregional and national levels described on the Convention website.

Understanding of the indicator
The indicator measures the presence at the subregional, regional and global levels of DLDD-related knowledge-sharing processes, through the quantification of the type and number of existing knowledge-sharing systems. Effectiveness of these systems is measured through quantification of their user-base. The indicator will inform to what extent scientific and traditional knowledge, including best practices, are available to and sufficiently shared with end-users. This information will be complemented by the reporting of other reporting entities on existing UNCCD-relevant knowledge-sharing systems at the national levels.

Data needed
- Information from websites.
- Only DLDD-relevant knowledge-sharing systems and networks shall be considered.

Data sources (indicative only)
Relevant organizations at the subregional, regional and global levels.

Check the glossary for
‘knowledge-sharing system’, ‘PRAIS’

Check the reporting manual for
‘How to determine the number of users in a knowledge-sharing system?’

Overall target
By 2010 the Convention website has been restructured and includes a thematic database on knowledge-sharing systems as part of the PRAIS.

Operational Objective 5: Financing and technology transfer

Performance indicator CONS-O-14 for Outcome 5.1
Number of affected country Parties, subregional and regional entities whose investment frameworks, established within the IFS devised by the GM or within other integrated financing strategies, reflect leveraging national, bilateral and multilateral resources for combating desertification and land degradation.

Understanding of the indicator
The indicator measures the presence of integrated financing processes allowing the leverage of national, bilateral and multilateral resources for combating DLDD, through the quantification of investment frameworks financially and/or technically supported by the GM, within the IFS devised by the GM, in affected countries and/or in subregions/regions. The information provided by the GM will be complemented by the reporting of other reporting entities on the IIFs at national, subregional and regional levels.

Data needed
Investment frameworks documents and other related documents.

Data sources (indicative only)
- Relevant units within the GM.
- Relevant national ministries, programmes/projects documents.

Check the glossary for
‘IFS’, ‘leveraging’, ‘IIF’

Overall target

If no, explain any evidence of incongruence and, if possible, provide reasons:
There is not operational objective 3 in the JWP
Standard Financial Annex

The CRIC has recommended that financial reporting be based on a standard financial reporting format to be used by affected country Parties and their development partners. It also indicated that emphasis in reports should be put on financial matters and also on an analysis of the impact of the activities undertaken (ICCD/CRIC(8)/5).

The purpose of the SFA is to consolidate information on resources mobilized by affected country Parties and their development partners under the framework of relevant strategies and action programmes. It facilitates the aggregation of data on financial commitments, financial flows and resources available by all relevant funding sources for activities related to the implementation of the Convention. It also helps minimize double counting in financial statistics (ICCD/CRIC(8)/5/Add.4).

The SFA is to be used by each country Party and other reporting entities to list all financial commitments they have made during the reporting period in support of institutions, programmes, projects, as well as other relevant initiatives undertaken at national or international level for the implementation of the Convention.

More specifically, for each relevant financial commitment or allocation made in the reporting period, the SFA requires a minimum set of data grouped as follows:

a. Identification, i.e. data required to identify the reporting entity, the funding source and the activity financed;

b. Basic data, i.e. data specifying the amount and type of financial commitment made, as well as the recipient country, region, and/or organization, and the funding period, if applicable;

c. Classification, i.e. categorization of the funded activity according to the Rio Markers for desertification, and the UNCCD Relevant Activity Codes (RACs).

The compilation of the SFA is guided by means of a template, which responds to the recommendations of CRIC 7, and builds on the GM methodological guide for financial reporting presented to CRIC 6 as part of the report of the intergovernmental Ad Hoc Working Group to improve the procedures for communication of information.

Within the template, shaded areas contain information and explanatory texts, while white areas are for reporting purposes and need to be filled in by the reporting entities with relevant data or narrative information.

Decision 13/COP.9, paragraph 8, invites country Parties and other reporting entities to refer to common terminology and definitions. Therefore, these guidelines should be read in conjunction with the comprehensive glossary of performance indicators for the review of implementation of The Strategy and Best Practices, common to all reporting entities and contained in a separate document (ICCD/CRIC(9)/13).

None delivered.
Programme and Project Sheets

Programme and Project Sheets (PPS) are used to provide more detailed information on programmes or projects undertaken or completed in the reporting period. This includes programmes and projects in the pipeline, as well as final proposals submitted for funding to internal or external funding sources. All country Parties and other reporting entities involved in the financing, coordination or implementation of relevant programmes and projects are requested to prepare a PPS for each of them, and to attach them to their official report to the UNCCD.

The compilation of the PPS is guided by means of a template. These templates are intended to collect a minimum set of qualitative and quantitative data to facilitate the analysis of funding and investment flows, and the production of better financial statistics related to UNCCD implementation (ICCD/CRIC(8)/5/Add.4), with a view to enabling the CRIC to undertake an objective review of progress in the implementation of the Convention and The Strategy. The PPS also facilitate the computation of certain performance and impact indicators.

A distinctive feature of the PPS is that it allows country Parties and other reporting entities to specify which strategic and operational objectives of The Strategy are targeted by each programme or project. In addition, it allows for individual programme or project components to be categorized using the Rio Markers for desertification and Relevant Activity Codes (RACs).

Furthermore, the PPS can be used to indicate whether the objectives of other Rio Conventions (i.e. the United Nations Convention on Biological Diversity, UNCBD – and the United Nations Framework Convention on Climate Change, UNFCCC) are also addressed by the programme or project. This is done through the use of the biodiversity and climate change Rio Markers, respectively.

The PPS offers an opportunity to increase the visibility of relevant programmes and projects, thereby creating the conditions for a better sharing of experiences and lessons, as well as the transfer of knowledge in general. It also favours collaboration and networking by facilitating the identification of potential synergies.

Lastly, the PPS also allows country Parties and other reporting entities to provide a narrative description of the expected or achieved results. This information will facilitate the qualitative assessment of progress in the implementation of The Strategy, including on returns on investment. The CRIC will use the analysis of financial information originating from the PPS to assess results, performance and impacts.

To minimize the reporting burden and avoid discrepancies in the information annexed to the reports of different entities, it is recommended that project partners identify the most suitable ways to coordinate among themselves the preparation of PPS to ensure that consistent data are reported for the same projects. It would also be advisable to compile just one PPS for large “umbrella” programmes, instead of separate PPS for each small project stemming from them.

**Additional Information**

The section on additional information is meant to provide an instrument of flexibility in the reporting exercise as well as to enrich the knowledge base of the CRIC on concrete issues faced by those entities reporting to the Convention and consequently to make more targeted and specific recommendations to the COP. In general, it allows commenting or reporting upon issues that are not covered elsewhere but that are nevertheless of importance within the framework of the implementation of The Strategy and the Convention.

The additional information section allows feedback to be received on the reporting process. It is also meant to accommodate ad hoc COP requests for reporting on specific topics or new reporting requirements deriving from COP deliberations that may supersede existing ones and imply changes in implementation.

The proposed template for reporting is adjusted to the mandate of the GM, as requested by decision 13/COP.9, paragraph 17 of the attachment; in particular, it responds to the request under paragraph 7 of the attachment to provide in the GM’s report additional information relating to the reporting process.

**Reporting process-related issues**

**Financial resources**

*Did the GM provide financial support to affected country Parties to meet UNCCD reporting obligations?*

Yes

*Provide an estimate of the amount invested by your organization into the UNCCD reporting process.*

150000 US Dollar

**Human resources assigned to assist country Parties and other reporting entities during the reporting process**

*How many people were involved in the GM in the UNCCD reporting process?*

15

*Estimate the total number of person/day dedicated by these people to the UNCCD reporting process:*

7

**Knowledge**

*Could the GM count on sufficient in-house technical and scientific knowledge to meet UNCCD reporting obligations?*

Yes

*If no, describe the main reasons and the difficulties encountered.*

No answer required.

**PRAIS portal**

*Did the GM make use of the training on access and utilization of the PRAIS portal?*

No answer provided.

*Did you experience difficulties with access and utilization of the PRAIS portal?*

Yes

*If you experienced difficulties, identify the reasons.*

Rate the level of importance by using a scale from 0 to 5, where 0 is not important at all and 5 is very important.

### Accommodation of specific requests within COP decisions

**Report on specific COP requests – iterative process on indicators**

Decision 13/COP.9, paragraphs 2, 3 and 4, envisages an iterative process to refine the set of performance and impact indicators. As a tool to implement this iterative process, the GM can provide here its suggestions and recommendations for improvement.

**Question marked as 'Skipped'**.

**Indicate against which of the e-SMART criteria the indicator(s) needs to be improved.**
